TEAM ID	PNT2022TMID49029
PROJECT NAME	Fertilizer Recommendation System For Disease Prediction

Project Flow:

- Download the dataset.

- Classify the dataset into train and test sets.

- Add the neural network layers.

- Load the trained images and fit the model.

- Test the model.

- Save the model and its dependencies.

- Build a Web application using a flask that integrates with the model built

Architecture of the leaf disease detection system
